* Not A Paint Finish | ^{††} 5000 sq. ft. min. | [†] This material is batch sensitive and directional. Do not mix batches or coil lots. Premium color. Slightly higher prices.

Directional Coating: When two aligned panels are placed next to each other, they may look like the same color. However, if one of those panels is flipped around, the colors seem to change, making the panels look different. Changing the direction of installation for one of the roof panels will result in the panels appearing to be different colors.
