

## **Bonderized Disclaimer.**

Bonderized is a thinly coated zinc phosphorous plated paintable product, which is sold as a paintable product. Bonderized has some minor dis-colorization and may have small bare spots, light streaking and minor scratches thru out the coil / material. Bonderized also has a residue film from the way it is processed and coated at the mill. All these above are normal with bonderized and not a reason for rejection as this material is sold as a paintable product and is meant to be painted to cover up all minor imperfections. These minor issues are part of the process in coating the materials at the mill and are beyond our control here at Western States Metal Roofing. This disclaimer is to make you aware of these minor issues before you take delivery of your product. This material is sold as is.

We at Western States Metal Roofing will apply protective film to minimize continued scratching of the flat stock and trim flashings provide by us the manufacture. We will pass along the cost of this protective film to you. The film will be your responsibility remove within a timely fashion and we will not be held liable or accountable for acquired cost to remove protective film at your location. You may refuse to have protective film applied, but it is highly recommended that protective film is applied for this product, as this material will scratch fairly easy.

Coil is processed out of house and will not come with protective film. Coil may come with minor scratches due to the fact this material scratches fairly easy and the way it is processed and spun at the processor.
